PROFESSIONAL SUMMARY

Senior iOS Developer with over 8 years of experience in crafting scalable, high-performance mobile applications using Swift and UIKit. Expertise in MVVM and MVC architecture, combined with a strong focus on modular app design and adherence to SOLID principles, ensures the delivery of clean, maintainable, and testable code. Proven ability to manage large datasets with Realm Database, optimize performance through multithreading techniques, and implement robust offline-first architectures for mission-critical applications. Skilled in cross-functional collaboration within fast-paced SaaS environments, taking ownership of features from architecture to release while driving mobile performance optimization and enhancing user experiences for enterprise-scale applications.

WORK HISTORY

Senior Software Engineer | Ascension Engineering Private Limited - Greater Noida, India (Remote) *08/2024 - Current*

Impact & Ownership

- Reduced code complexity and improved runtime performance by optimizing core algorithms and leveraging **Windsurf AI-assisted refactoring**, resulting in faster feature development and cleaner architecture.
- Increased application stability by driving **rigorous debugging, unit testing, and SonarQube enforcement**, contributing to a measurable reduction in production crashes.
- Designed and shipped **reusable iOS components**, reducing duplicate code and accelerating delivery across multiple features.
- Led iOS development execution, ensuring **on-time releases**, stable **CI automation**, and consistent delivery quality across sprint cycles.
- Delivered modern native iOS features using **Swift**, while introducing **SwiftUI** for new feature development to improve UI scalability and maintainability.
- Contributed to a **Compose Multiplatform (Kotlin + Compose) application**, enabling shared business logic while preserving an iOS-first architecture.

Project: LoanDepot Mobile App

<https://apps.apple.com/us/app/loandepot-mobile/id1600224229>

- Owned and delivered high-impact features including **Live Activities, MFA, AutoPay, and HELOC Draw**, directly improving customer engagement and payment reliability.
- Implemented **MVVM architecture** using **RxSwift, RxRelay, and SwiftRex Arc**, increasing the crash-free user rate from **88% to 99%**.
- Optimized performance-critical flows and threading, ensuring **accurate AutoPay cutoff handling** and improved responsiveness under peak usage.

Senior Software Engineer(iOS) | DMI (Digital Management, LLC) - Noida, India*03/2020 - 08/2024*

- Implemented VIPER architecture with SOLID principles in the UpGrad project to ensure maintainability and scalability.
- Developed cross-platform solutions using Flutter for efficient multi-platform deployment.
- Integrated push notifications and Live Activities in the LHR project to enhance real-time user engagement.
- Built apps using OKTA authentication and Bluetooth payments in the American Tier Distribution project.
- Utilized Locuslab SDK and Salesforce in the LHR project for advanced geolocation services and CRM integration.
- Employed SwiftUI and Combine in both the American Tier Distribution and LHR projects for modern, reactive UI development.

Project:-

- LHR - iOS App - <https://apps.apple.com/gb/app/lhr-london-heathrow-airport/id427951859>
- UpGrad Learning App :- <https://apps.apple.com/in/app/upgrad/id1191301447>
- American Tier Distribution
- American Psychiatric Association :- <https://apps.apple.com/us/app/dsm-5-tr-diagnostic-criteria/id6444126162>

IOS Developer | Quaerotech Private Limited - Noida, India*05/2019 - 02/2020*

- Developed iOS apps with MLM features, integrated payment gateways like PayPal and PayUmoney, and crafted complex UIKit designs.
- Extensive Agile (Scrum) experience, converting requirements into deliverables, meeting milestones, and publishing apps to the App Store.
- Led the implementation of MVVM architecture, collaborating closely with QA to ensure smooth, bug-free releases.
- Improved app functionality and user experience through strategic third-party library integrations.
- Successfully launched over 8 apps, now live on the App Store.

Projects:-

- UDYAMI - <https://apps.apple.com/in/app/udyami/id1489278467>
- CashBag :- Utility and ecommerce app
- BizWay:- Poultry farm App which is based on Utiliies

IOS Developer | DevGenesis Private Limited - Noida, India*10/2017 - 11/2018*

- Blockchain Development: Integrated Ethereum in iOS apps using WEB3swift and Keystone, building 5+ blockchain-powered apps.
- Full-Stack Skills: Developed backend with Node.js and built databases for web applications.
- API Integration: Integrated REST APIs for wallet apps.
- Teamwork & Communication: Enhanced collaboration and created a productive work environment.
- Project Management: Translated designs into iOS frameworks, delegated tasks, and ensured multi-device compatibility through testing.

Project :-

- ERC20 Wallet :- <https://apps.apple.com/us/app/ethereum-block-explorer-erc20/id1261772749>
- CryptCoin: - Based on Ethereum Blockchain App

Mobile Developer | Student Edventures Private Limited Delhi - Delhi, India*02/2016 - 10/2017*

- Developed variety of mobile apps (car selling, iBeacon, etc.) with expertise in iOS, Android, and REST API integration.

- Optimized app performance, contributed to UI/UX design, and maintained legacy apps for long-term value.

Project: -

- Delhi Ford Group :- Car Selling and feature app
- Timble Paperless Attendance - <https://apps.apple.com/us/app/timble-paperless-attendance/id1020909123>
- Timble Admin App - Manage All attendance app
- Libramattress Sells Management App

EDUCATION

Amity University - Noida

07/2016 - 11/2019

MCA(Master of Computer Application): Computer Science And Programming

C-DAC,PUNE - Pune

08/2014 - 11/2015

Diploma: Advanced Software Development Methodologies

M.J.P. Rohilkhand University - Bareilly

07/2011 - 07/2014

Bachelor of Science: PCM

GPA: 56.6

ARTICLE

Integrated Ethereum in iOS apps using Web3swift and Coinbase for wallets, transactions, and smart contracts.
